Senior Design Project I

Report #1

Project Name: Plan My Day

URL: https://github.com/nehiryigitkarahan/webpage.git

Team Members: Gökalp Fırat & Nehir Yiğit Karahan

Supervisor and Jury Members:

Supervisor: Tayfun Küçükyılmaz

Jury Members:

Description of the project:

We will create a software which makes people's plans detailed and easier to follow. "Plan My Day" listens or reads your plans like a friend and then it marks the locations that you will go and prepares you an efficient path. By the help of the gps on your mobile device it can also navigate you if you want so.

You may not need it now since you already know what is where, but this is designed for people who don't know the city or the religion at a time. So, if they say, "I want to go Kızılay with bus", s/he will get the path to the station of the bus which is going to Kızılay and s/he will be navigated like a car driver.
